

OperationalState::configure

ReadyState::configure

ConfigurationState
::getInstance

```
graph LR; A[OperationalState::configure] --> C[ConfigurationState::getInstance]; B[ReadyState::configure] --> C;
```

The diagram illustrates a shared dependency or call pattern. Two source methods, 'OperationalState::configure' and 'ReadyState::configure', are shown on the left. Both have blue arrows pointing to a single target method, 'ConfigurationState::getInstance', located on the right. The target method is highlighted with a gray background, while the source methods are in white boxes with black borders.
